

Canberra Data Week × NYSF

A STEM-pipeline partnership — the capital's data, the next generation's future.

Canberra Data Week (31 Aug – 5 Sep 2026) is the capital's citywide festival of data & AI for public good. The National Youth Science Forum brings 300+ Year 12 students to Canberra each January to discover where STEM can take them. Together we can put Australia's next generation of scientists at the centre of the data and AI shaping their world — right here in Canberra.

FIVE WAYS TO PARTNER

01

Youth Data Challenge

Year 10–12 students turn a real ACT open dataset into an insight, mentored by industry data pros — finalists present at CDW.

02

Data & AI Careers Stream

A CDW-curated block inside NYSF's Careers Day: live demos, speed-mentoring and 'where a data career can take you'.

03

Access & Equity Scholarship

CDW and its sponsors co-fund NYSF scholarships for regional, remote and under-represented students — spotlighted at CDW.

04

'Data Lab' STEM Hub

Co-design a data & AI module for an NYSF STEM Hub: a behind-the-scenes lab inside a real Canberra data environment.

05

Youth Voice on the Mainstage

NYSF alumni take a CDW stage — a next-gen data-leaders panel and reverse-mentoring with industry leaders.

THE FIT

Both proudly Canberra-based. NYSF's calendar peaks in **January** (Year 12 Program) and **July** (STEM Hubs); CDW runs **31 Aug – 5 Sep** — three natural touchpoints across the year. NYSF reaches a diverse cohort (≈46% regional or remote, ≈61% young women), matching CDW's 'everyone has a seat' ethos.
